Cuckoo Clock Shipping Instructions

- Read through all instructions before beginning to pack the clock
- Pack Cuckoo clock back in original box if you have it. If not just use a box that is close in size to the clock. Include the pendulum when sending the clock.
- Pack first box into a second box. Double boxing the clock is the best way for shipping.
- Do not send the weights. There is a number stamped into the weights, which is the weight of the weights, write that number down so we can use our corresponding weights.
- Do not send any attachments that clip on to the clock. Ex. Deer head, birds, etc.
- In the box include a letter that lets us know what is wrong with the clock, the weight of the weights, name, address, and phone number
